Observed regional changes and proposed cardiovascular links

Current measurements | Prior report | Proposed link

A Cervical perturbation

B Regional medullary tissue

Ang II / AT1-R expression
Prior report [13]

RVLM and adjacent medullary tissue

Estimated Nox1 / Nox4 mRNA ↑

SOD activity ↓ MDA ↑

Probe-associated fluorescence ↑

Model vs sham · day 28 · n = 6/group

C Proposed functional links

NOX-related redox signaling?

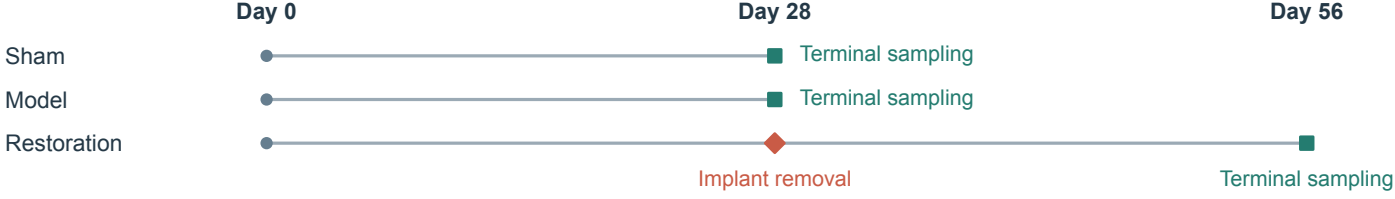

↓

Increased sympathetic drive?

↓

Elevated blood pressure
Prior / shared observations [4,13]

Sampling design

Terminal times differ; no time-matched second-surgery sham control.
